EXPERIENCE

Mobile Application Developer

ThoughtBox Online Services Pvt Ltd

March 2024 – Present Kochi, India & Qatar (onsite)

- **Onsite in Qatar (9 months):** Worked at the client site of **Al Zaman Exchange** to develop and deploy the product through to production release.
- Build and maintain a family of branded fintech apps (remittance, currency exchange, bill payments) from one Flutter codebase for Android, iOS, macOS and Windows.
- Built a shared design system: token-based theming with ThemeExtension and a reusable widget library, so multiple client brands run on one codebase.
- Integrated gRPC APIs against Go microservices for transactions, beneficiaries and real-time data; structured features with BLoC and GetX.
- Implemented push notifications (FCM/APNs) on mobile and desktop, native PDF printing and viewing, utility bill-payment integrations and AML watchlist screening screens.
- Remediated VAPT security findings on Android and iOS, and planned the Play Store production go-live with forced-update and rollback strategy.
- Used Dart isolates to move heavy processing off the UI thread, keeping large data screens responsive.

Flutter Developer

Spoider Innovations Pvt Ltd

Aug 2023 – Feb 2024 Coimbatore, India

- Designed and developed a cross-platform cab booking application with a clean UI and smooth user experience using Flutter.
- Integrated Google Maps SDK for real-time location tracking, route navigation, and geolocation services.
- Implemented secure and seamless payment gateway integrations (e.g., Razorpay, Stripe, etc.) for booking transactions.
- Gained hands-on experience in deploying applications to both Google Play Store and Apple App Store, including managing certificates and store listings.
- Followed best practices for state management, performance optimization, and responsive design.

PROJECTS

Sweep (Service Booking Application)

flutter, getx, php backend

- Service booking app with OTP email verification, booking history, ratings and in-app dispute raising.
- Push notifications for announcements and booking updates; localisation for multi-language support.
- GetX for state management and routing over a PHP REST backend.

SKILLS

- Flutter, Dart
- State management (BLoC, GetX, Provider)
- gRPC APIs , REST APIs
- Android, iOS, Web, macOS, Windows desktop
- Firebase, Push notifications (FCM/APNs)
- Payment gateways (Razorpay, Stripe)
- Google Maps SDK
- Local storage (Hive, GetStorage, SharedPreferences)
- Localisation
- CI/CD and testing
- Git, GitHub, Figma

EDUCATION

Brototype

Mobile Application Development using Flutter

2022 – 2023

Diploma

St George's Pvt ITI

2018 – 2020

LANGUAGES

- English (professional)
- Malayalam (native)
- Tamil (limited working)

MINI PROJECTS

Weather App

flutter, openweathermap api

- OpenWeather API used to fetch weather data.
- Users can see weather conditions of current location in home screen.
- Users can search other locations for weather information.
- Temperature, wind speed, humidity, and max temperature shown in UI.

Netflix Clone

flutter, tmdb api, bloc

- TMDB movie API used to fetch movie data.
- Bloc used for state management.

Rent Truck Drivers Application

flutter, getx, php backend

- Driver app with document verification, earnings dashboard (total collection, available balance) and in-app loan requests with admin approval.
- Push notifications for announcements and loan status updates.
- GetX for state management and routing over a PHP REST backend.

Quibix (E-Commerce Application)

flutter, firebase, razorpay, provider

- E-commerce app with cart, wishlist, search, addresses, orders and order history; Razorpay checkout.
- Firebase Authentication and Firestore backend; Provider for state management, structured with DDD.
- **GitHub:** github.com/SirajMM/Quibix-ecommerce-app

Blaze Player (Music Player)

flutter, hive, musixmatch api, provider

- Fetch songs from local storage.
- Hive database used.
- Musixmatch API used for lyrics of the current song.
- State management using Provider.
- Built with MVVM architecture.
- Play, Pause, Next, Previous functionalities.
- Create, edit, and delete playlists.
- Features: like song, search, most played, recently played screens.
